

Hardware Reset Approach for KPD604

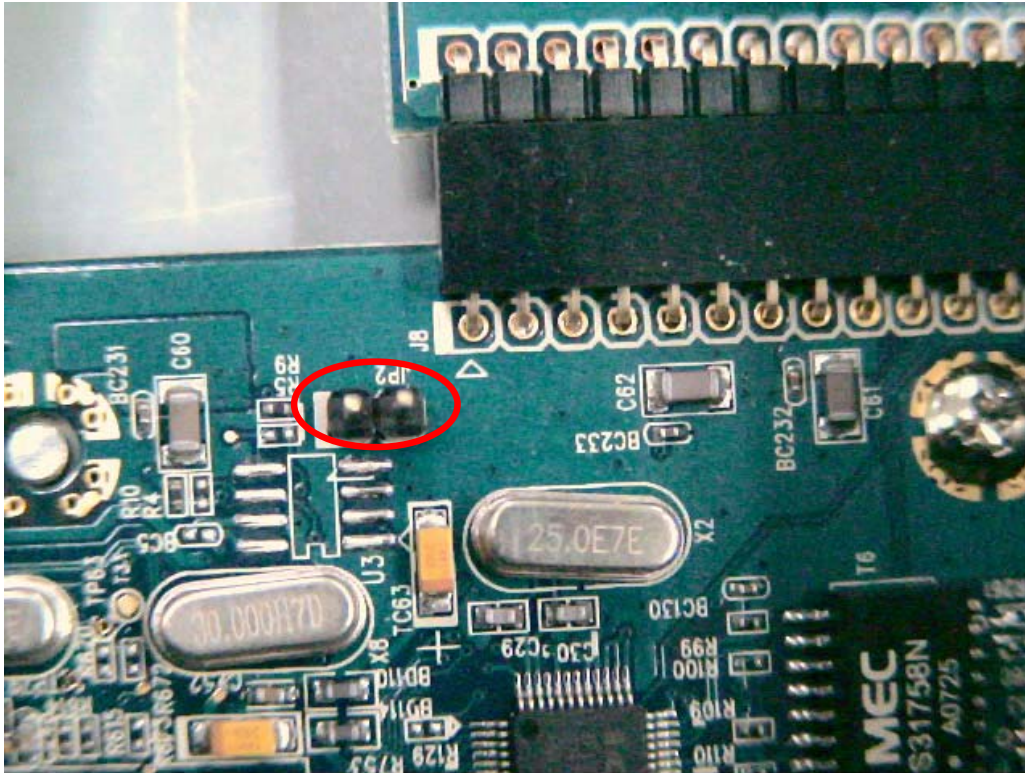

1. Turn off the power and dismount the cover from the unit.

2. Find the Reset Position (JP2)

3. Take a closer look at Reset Position.

4. Connect the two jumps (pins) to form a short circuit Then plug in the power and hold the short circuit for about 15 seconds until appears the initiation picture and then DVR will be rebooted after 5 seconds.
